DETAILED ACTION

Claim Rejections - 35 USC § 103

1. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

2. Claims 1-5 are rejected under 35 U.S.C. 103(a) as being unpatentable over Allabaugh in view of Crute, Jr. and Naka. Allabaugh discloses the claimed invention except for plastic composition and the reinforcing ribs. Crute, Jr. teaches that it is known to provide a vent cover to be of a plastic material as set forth at column 3, lines 14-28. It would have been obvious to one having ordinary skill in the art at the time the invention was made to make the removable closure of Allabaugh of a plastic composition, as taught by Crute, Jr. in order to reduce its weight and render the same easily handled. Naka teaches that it is known to provide floor cover with projecting ribs as set forth at column 4, lines 29-31. It would have been obvious to one having ordinary skill in the art at the time the invention was made to provide the undersurface of the closure of Allabaugh with ribs, as taught by Naka in order to reinforce the same. As to claims 2 and 3, Crute, Jr. teaches that it is known to provide a vent cover with a sealing gasket and also for sealing engagement with the adjacent surface of the wall around the opening there through as set forth at column 2, lines 14-19. It would have been obvious to one having ordinary skill in the art at the time the invention was made to provide the closure of Allabaugh with sponge rubber, as taught by Crute, Jr. for its intended purpose.

Election/Restrictions

3. Claims 6-8 are withdrawn from further consideration pursuant to 37 CFR 1.142(b) as being drawn to a nonelected species, there being no allowable generic or linking claim. Election was made **without** traverse in the reply filed on October 4, 2004.

Response to Arguments

4. Applicant's arguments filed May 5, 2005 have been fully considered but they are not persuasive. In response to applicant's argument that Naka is nonanalogous art, it has been held that a prior art reference must either be in the field of applicant's endeavor or, if not, then be reasonably pertinent to the particular problem with which the applicant was concerned, in order to be relied upon as a basis for rejection of the claimed invention. See *In re Oetiker*, 977 F.2d 1443, 24 USPQ2d 1443 (Fed. Cir. 1992). In this case, Naka is of the same field of applicant's endeavor which is covering an opening in a building which is in the field of CLASS 52 STATIC STRUCTURES (E.G., BUILDINGS), subclass 19 WITH ENTRANCE FOR PERSONS OR OBJECTS IN HORIZONTAL OR INCLINED COVER, subclass 20 With additional enclosure structure; e.g., manhole.

5. In response to applicant's argument that there is no suggestion to combine the references, the examiner recognizes that obviousness can only be established by combining or modifying the teachings of the prior art to produce the claimed invention where there is some teaching, suggestion, or motivation to do so found either in the references themselves or in the knowledge generally available to one of ordinary skill in the art. See *In re Fine*, 837 F.2d 1071, 5 USPQ2d 1596 (Fed. Cir. 1988) and *In re Jones*, 958

Art Unit: 3749

F.2d 347, 21 USPQ2d 1941 (Fed. Cir. 1992). In this case, a suggestion to combine the reference was given in the above rejection.

6. As to the recessed peripheral border provided with a plurality of holes, the plate 7 of Allabaugh is recessed and also is provided along its peripheral border a plurality of opening 14 for receiving hooks 10.

Conclusion

7. **THIS ACTION IS MADE FINAL.** Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

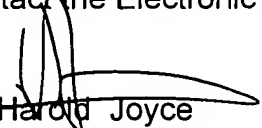

A shortened statutory period for reply to this final action is set to expire **THREE MONTHS** from the mailing date of this action. In the event a first reply is filed within **TWO MONTHS** of the mailing date of this final action and the advisory action is not mailed until after the end of the **THREE-MONTH** shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than **SIX MONTHS** from the mailing date of this final action.
